

BEYOND OWLS- LAUNCHPAD

ADDED UTILITY: LAUNCH PAD ACCESS FOR NFT HOLDERS (Not Guaranteed)

After developing for a long time to release our product on APTos. We have found very difficult to launch using any launch pad. Lots of them make it almost impossible to launch on their platform and only allow certain projects that they likely themselves build up to launch, what we have concluded after reaching out to all of them, most of the prevalent launch pads have a very close relationships with the projects that launch on their platform and the amount of money they can make off the projects is more important to them over anything else.

We have decided to create our own launch pad and will help these launch pads ease some of the demand they face.

To do this if you hold our NFT and want to launch on our launch pad you will have to pay 370 dollars in our launch pad fees contingent on doing a very stringent ama on our twitter space with us. If you don't hold our NFT and want to launch on our platform the fees will be 1000 dollars to do so. (1.7% of the raised funds will be kept by Beyond Owls)

The money will be used strategically to buy back and burn our tokens, development and growth of our platform.
