

ALGORITHMIC TRADING BOT

Our team is working on developing a trading bot. Although the first 2 utilities are complete. This will take about 12 weeks to complete. And is based on the strategies defined in the book master day trading by Oliver Velez.

In the strategy defined you can lose 70 percent of the trades and if you are right 30 percent of the time you will still come out in profit. After reading several books on trading this strategy is the one that has been the most successful. We will use the strategies defined this book to make 100 trades using our bot in different centralized exchanges and part of the profits generated will be used to buy back and burn our token.
